

**Guidance**  
**Resulting from November 13-14, 1997**  
**from Management Team**

**Storage:**

Minimum storage will be sized to meet ERPP flows, plus similar yields for agricultural and urban uses. Provision for flood control will be included, but be shown separately

Maximum storage will be:

3.0 MAF Sacramento Valley surface  
500 TAF San Joaquin Valley surface  
200 TAF in-Delta or near-Delta  
2.0 MAF South of Delta off-aqueduct  
250 TAF Sacramento Valley Ground Water  
500 TAF San Joaquin Valley Ground Water

For planning purposes, analyses will be performed assuming Los Banos Grandes is and is not included.

*Free to examine potential modification of X2*

**Policy Group Presentation:**

Explain our process for defining operational criteria

Explain what are our three alternatives, and how they relate to the twelve alternatives from which they come.
